EDUCATION

Institut Tecnològic de Barcelona (2021-2023)

Honors Degree in Multiplatform Application Development, applied to Intelligent Systems and AI.

Universitat de Barcelona (2016-2019)

Degree in Physics

- First 2 years of the program.

- Practical experience in electromagnetism, optics, astronomy, mechanics, and thermodynamics.

- Participation in assemblies and projects to enhance the student experience at the university.

- Attendance at presentations and talks, both from faculty members of the department and external/international speakers.

PROFESSIONAL DEVELOPMENT

Software Developer

Travelport | May 2022 - May 2023

- Internship at the company entirely in English for one year (1000 hours).

- Undertaking various projects, both individual and group-based, focused on JavaScript and its associated tools (React, Yarn, npm, NodeJS, TS, Redux...) and learning Agile methodology for improved collaboration and communication within a team.

- Executing projects using the work environment and tools of the company.

Access controller

Grup BarnaPorters | Oct 2016 - July 2017

- Monitor access to rooms or restricted areas at the Fira de Barcelona for events such as MWC, *Saló de l'Automòbil*, exhibitions...

- Monitor access to the presidential suite in the family box at the RCD Espanyol football stadium.

Private lessons

Usually self-employed | March 2014 - Present

- Private lessons in all subjects for secondary education (ESO) and the scientific-technological branch of high school (*bachillerato*) for students from both my own school and external students.

- Occasionally, unofficial classes for groups of students, such as multiple siblings from the same family or from the same class.
